A corrigendum on

Auditory tests for characterizing hearing deficits in listeners with various hearing abilities: The BEAR test battery

by Sanchez-Lopez, R., Nielsen, S. G., El-Haj-Ali, M., Bianchi, F., Fereczkowski, M., Cañete, O. M., Wu, M., Neher, T., Dau, T., and Santurette, S. (2021). *Front. Neurosci.* 15:724007. doi: 10.3389/fnins.2021.724007

In the published article, there was an error in **Equation (1)** as published. **The right part of the equation contained a sinusoid with $f = f_c$ (stimulus frequency), where the correct formulation is with $f = f_r$ (frequency rate).** The corrected **Equation (1)** appear below.

$$wt(f_c, t) = \sin \left(2\pi f_c t + \frac{f_c f_e}{f_r} \sin(2\pi f_r t) \right), \quad (1)$$

Additionally, the email address of the corresponding author RS-L has been updated from rsalo@dtu.dk to raul.sanchezlopez@igdore.org.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
