Undervisningsportfolio

1. Formel Pædagogisk Uddannelse

I have no formal education in teaching-pedagogics except from minor targeted courses. However, I have a substantial experience in teaching and it is my clear impression that my lecturing is considered of good quality – as indicated by the fact that I in 1998 was awarded "The Education Prize of The Faculty of Health Sciences".

Since 2002 I have been responsible for organizing of all ORL teaching of medical students at The University of Southern Denmark. In this way, I have earned more than fifteen years of experience in teaching-related leadership and management. Ultimo 2017 the ORL Research Unit included two professors, thirteen associated professors and seven PhD-students. During 2017 they delivered 484 lessons to medical students plus 533 lessons to audio- and audio-logopaedic students plus more than 300 hours of supervision to pre-graduate medical scientific projects plus an even higher number of hours for supervision of pre-graduate audio- and audio-logopaedic students.

Teaching-related courses;

- "Team Based Learning"; The University of Southern Denmark (3 hours).
- "Supervision of the research leader"; Odense University Hospital. 2017 (40 hours). Hogan Test, "Leadership of the research mission", "Personal leadership", "Leading of teams", supervision, coaching, sparring and reflective teams.
- Research Management Course – Copenhagen Business School (CBS) Modul 3: "The personal leadership" and evaluation tests (40 hours).
- Research Management Course – Copenhagen Business School (CBS) Modul 2: "The personal leadership", "Learning about cultures" and "Vision and aims" (40 hours).
- Research Management Course – Copenhagen Business School (CBS) Modul 1: "Leading in the professional environment", "Developments in the research environment", "Group dynamics" and "Whole brain test" (40 hours).
- "Supervisor course", University of Southern Denmark, 2004 (2 hours)
- "Multiple choice", University of Southern Denmark, 2003 (3 hours)
- "Education and quality", Danish Society of Medical Education, University of Southern Denmark, 2003 (8 hours)
- "Problem Based Learning – The Dutch Model", University of Southern Denmark, 2003 (12 hours)
- "Objective Structured Clinical Examination (OSCE) workshop", University of Southern Denmark, 2003
- "E-learning and Blackboard", University of Southern Denmark, 2003 (4 hours)
- "Problem Based Learning – PBL", University of Southern Denmark, 2003 (3 hours)

2. Uddannelsesadministrative opgaver

I have participated in the reorganization of the medical study twice and I have been one of the main actors in the creation of the Module K2 (Diseases in the Respiratory System) and Module K11 (Diseases in the Neural System and Sensory Organs).

In 2017 the Medical Candidate Education was reorganized and I was appointed head of the new Module K1 including

Cardiac Medicine, Pulmonary Medicine, Thoracic and Vascular Surgery and ORL. The module has 51 teaching professors and associate professors. The establishing of curriculum, study guide and new teaching principles have been time-consuming, challenging and exciting. A significant reduction and reorganization of the classical overview lectures into other educational methods has been frustrating for many of the lectures and a lot of time and leadership has been necessary to carry through the process. The FAIR principles (Feedback, Activity, Individualization and Relevance) are increasingly introduced in the module. During this process, I have worked intensively with Team Based Learning (TBL), podcasts and flipped classroom. Alone in the ORL part of the module professor Anette Kjeldsen and I produced fifteen podcasts and two TBL sessions.

Teaching leadership – head of Graduate School

Since 1st of October 2018 I have been head of the Graduate School of Health Sciences at the University of Southern Denmark.

The Graduate school comprises the Head of Graduate school, the PhD committee with academic subcommittees, supervisors with employment at/affiliation to the faculty, the faculty's graduate programs as well as the Graduate school secretariat.

The Graduate School of Health Sciences is part of the Faculty of Health Sciences, which consists of eight departments, 14 centers and 50 research units.

The Graduate School of Health Sciences has approximately 530 PhD-students.

My functions as leader is to set the direction of the school in general but also for all the individual elements such as selection of courses, education of supervisors, profiling of the school, defining criteria for enrolment, evaluation process, merits etc. I use approximately twenty hours per week on this function.

3. Erfaring med undervisning, vejledning og eksamen

Pre-graduate medical students

I have since 01.02.98 been employed as clinical lecturer (associated professor) at The Institute of Clinical Research, Faculty of Health Sciences, University of Southern Denmark.

The modules have had different names during the time and I have chosen the terms used today to simplify my descriptions. I have taught- and do teach medical students in the following modules:

- K2 (Diseases in the Respiratory System)
- K5 (Diseases in the digestive tract)
- K6 (Endocrinology and metabolism)
- K11 (Diseases in the Neural System and Sensory Organs)
- K14 (Clinical Courses)
- New Module K1 (Cardiac Medicine, Pulmonary Medicine, Thoracic and Vascular Surgery and ORL)

My average number of pre-graduate teaching lessons – including overview lectures (in 2017 160 students per lesson), lectures for smaller groups (approximately 35 students per lesson), training of practical skills (approximately 20 students per lesson) and patient demonstration (approximately 15 students per lesson) has since 1998 been approximately 60 per year, examinations not included.

Postgraduate teaching

- Since 1996 taught registrars under education for ORL-specialization in thyroid surgery and thyroid cancer (2 hours per year)
- Since 2002 taught registrars under education for ORL-specialization in laryngeal cancer (3 hours per year)
- Since 2008 taught registrars under education for specialization as endocrinologists in thyroid surgery and thyroid cancer (2 hours per year)
- In 2001 and 2003 taught registrars under education for specialization as pathologists in neck tumors (2 hour per year)
- In 2010 and 2012 taught registrars under education for ORL-specialization in research methods (7 hours per year)
- Since 2013 taught registrars under education for ORL-specialization in ultrasound examination of the neck and salivary glands (8 hours per year)

Speech therapist students

- Since 2008 taught speech therapist students in laryngeal cancer (4 hours per year)

Examination

- Since 1998 performed examination of medical students in ORL (10 hours per year)
- Since 2008 performed OSCE and MINI-OSCE examination in different parts of the study (40 hours per year)

4. Metoder, materialer og redskaber

- Written multiple sections constituting more than 5% of the official Danish textbook in ORL
- Written a chapter concerning acute ORL in the textbook "Acute medical conditions" Developed TBL-sessions
- Done multiple podcasts
- Done the whole framework for the practical skill course in ORL examination technique. In the last years, this work has been shared with my ORL professor colleague Anette Kjeldsen
- Made multiple OSCE examination questions, essay questions and multiple choice question

My teaching philosophy is that teaching needs to be presented in an enthusiastic and exciting way with maximal involvement of the students. I have tried- and feel comfortable with most teaching methods including overview lectures, PBL, TBL and bed-side teaching.

I have established significant routine in TBL and podcasts and I have as head of the new Module K1 been responsible for the implementation of the FAIR principles in the module. This work has been performed in close collaboration with the pedagogic specialists from the University of Southern Denmark.

My plans for teaching if appointed to the position

According to my actual job description as a 5-year clinical professor I have had no teaching obligations. However, since the start of the position in July 2013 I have had more than 50 teaching hours per year in Medicine and Audio-Logopaedics delivered con amore.

I will continue my work as head of the new Module K1 with focus on the ongoing change in teaching strategy from classical overview lectures towards the FAIR principles.

To keep in touch with the teaching pedagogic development and the effects of our interventions I plan to continue my load of teaching at the actual level. Also, I find teaching very stimulating and I like the dialog very much with the students, which is of utmost importance for the recruitment of new researchers and medical doctors for our specialty.
