CV

Sven Tougaard earned the MS (1975) at the Technical University, Copenhagen, Denmark, and the PhD (1979) and dr. scient (1988) degrees in theoretical and experimental surface physics at Odense University, Denmark. He was post. doc. in USA and Germany (1978-84) and professor at the University of Southern Denmark since 1984. He founded the software company QUASES-Tougaard Inc. (1994) (www.quases.com) which develops software for characterization of the composition and electronic properties of surface nanostructures by X-ray photoelectron spectroscopy (XPS) and reflection electron energy loss spectroscopy (REELS). Prof. Tougaard received the Fyns Stitstidendes Research Prize in 1987, the Rivière Prize awarded by the UK Surface Analysis Forum in 2007, "for work which has been judged outstanding in its continuing and lasting contribution to surface analysis", and the Albert Nerken Award by the American Vacuum Society in 2012 "for contributions to the development of improved methods to characterize thin-film nanostructures by X-ray photoelectron spectroscopy". His current research focuses on experimental and theoretical studies of phenomena induced by the electron-solid interaction at surfaces and in nanostructures and development of theory for practical experimental methods to determine the chemical composition and electronic properties of nanostructures by electron spectroscopy. He has conducted and participated in several EU supported international projects on these subjects, published more than 200 scientific papers that are cited more than 7000 times with an H-index = 42 and presented more than 60 invited talks at international conferences and workshops. He has a long-standing active scientific collaboration with several research institutes in Europe, USA, Korea and Japan. He is on the Steering Committee for ECASIA (European Conf. for Surface and Interface Analysis) (2002-) and has served on the program committees and advisory boards for more than 25 international conferences and workshops. He serves on the editorial board for the journals: J. Electron Spectroscopy (1990-2012), Surface and Interface Anal. (1989-), J. of Surface Analysis (1994-), and Surface Science Spectra (1991-).
