Formal educational training

Lecturer program at SDU (Pædagogikum) 2023-2024
Didactical and pedagogical courses during my Master's at ETH Zurich (1999-2006)

Administrative tasks relating to education

Experience of study programmes, supervision and examinations

Methods, materials and tools

Supervised 30+ Bachelor's students
Supervised 25+ Master's students
Teaching at Bachelor's and Master's levels
Responsible for 2 Master's courses
Developing course Program for TE-1
Coaching the Coaches CoachEd6 international coaching education

Educational development and applied research into teaching at university, including educational awards

Reflection on your own teaching practice and future development, including student evaluations

My teaching philosophy is based on the assumption that students have the greatest benefit when they actively engage during the lessons, take responsibility for their learning, and exercise themselves in self-reflection. Providing a platform to spur discussion based on relevant academic texts and scientific evidence is my main concern when planning the teaching. To relate theory and practice, I provide many practical examples during the lectures. My teaching contains lectures, group work, journal clubs, discussions in smaller and bigger groups, student presentations and creative workshops.
