CV

Education and academic achievements

- 1974 Awarded Gold Medal for Prize essay on plasmid-mediated resistance, Aarhus University (AU).
- 1977 Medical doctor (AU).
- 1980 PhD (AU). Thesis: "Infectious drug resistance"
- 1990 DMSci (AU). Thesis: "Monitoring antimicrobial drug resistance in hospital Micro-organisms".
- 1991 Specialist in clinical microbiology.
- 2003 Lead auditor, Danish Standards Association's infection control standards DS2450 & DS2451.

Appointments (selected career resume)

1982-1986: Associate Professor in medical microbiology, Aarhus University.
1994-1995: Chief consultant in clinical microbiology, Aarhus University Hospital (AUH).
1995-2006: Head of Department, Clinical Microbiology, AUH.
2006-2009: Chief consultant and Associate Professor in Clinical Microbiology, AUH.
2009-2018: Professor and Head of Department, Clinical Microbiology, Vejle Hospital.
2018 - : Professor and specialist chief physician, Clinical Microbiology, Vejle Hospital.

Competences

Organizational and administrative experience:

- Founder and software developer of 1) a computer based laboratory information system in clinical microbiology (MADS) from 1979-1980, in routine use at AUH from 1981; 2) HAIR, an electronic regional hospital Infection monitoring system, developed between 2006 and 2011 (Routine use in Region of Southern Denmark from 2018), 3) LIVA a regional MRSA database and web application for surveillance of MRSA (since 2016).
- Past president of the Danish Society for Clinical Microbiology (DSKM), 2003-2006.
- Chairman of the national board for specialist training in clinical microbiology, 2003-2007.
- Head of Department (1995-2006) and Head of Research (2006-2009), Clinical Microbiology, AUH.
- Head of Department (2009- 2018) and Professor (2009-), Clinical Microbiology, Vejle Hospital.
- Chairman of speciality council for clinical microbiology in the Region of Southern Denmark, 2019-

Research and development

Current fields of special interest:

- Detection of microorganisms in clinical samples by PCR.
- Bacteraemia and septicaemia
- The relationship between antibiotic use and microbial drug resistance. Antibiotic stewardship.
- MRSA and GBS epidemiology
- Epidemiology and surveillance of hospital infections by use of computer models and data from Electronic hospital registries.
- Building predictive model for risk of acquiring hospital infections by use of machine-learning and Artificial Intelligence.

Publications in peer-reviewed journals (beginning of 2020): 149 (30 within last 5 years).

Research supervision: Previously supervised 11 PhD students, presently principal supervisor for two PhD students and co-supervisor for three other PhD-student at the University of Southern Denmark.

Reviewer (member or chairman of assessment committees) of 1 doctoral and 19 PhD theses.
