Pedagogical view :

My basic believe is that I as teacher/supervisor must facilitate and nourish the students drive to become knowledgeable about their subject. I strive to due this by providing the necessary basic knowledge and from there pointing them in the right direction. always with a firm believe that the students needs to take ownership of their learning and projects

Previous teaching

- Chemistry, biochemistry and basic physiology for welfare technology students
- Supervisors for students with in pharmacy, Chemistry and Chemical engineering
- Laboratories exercises in natural products chemistry and analytical chemistry
- Co- supervisor for several master projects
- Responsible for several outreach project for high school students
