### **PH.D. COMMITTEES**

In the following, the term "qualifying exam" is used as a translation for the Danish "kvalificerende eksamen". However, there is a considerable variation among different institutions as to how this term is interpreted. In Denmark, it is a mini Ph.D. defense" in the form of a mid-way evaluation after two of the four years of a Ph.D. study. The student presents research results already accomplished and fairly detailed ideas for future work, before the external examiner asks questions about the presentation, the report, and the future plans.
