Research management and funding

Leader of three SNF (now FNU) funded research projects in the period 1992-1996,

Leader of the departments research group involved in collaboration with industrial partners. This has resulted in external support totalling more than 2 million d.kr.

Together with 6 colleagues at IMADA I obtained a funding of 12 million d.kr from the Danish research council for funding of PhD students in the period 2010-2013.

Participant in the research project "Research activity in discrete mathematics", chief investigator, professor Carsten Thomassen, DTU. since 1989. The project has been supported by the Danish National Science Research Council since 1989. For the period 2007--2012 we received 7.4. million d.kr in support. A significant part of this funding was used on postdocs and PhD students under my supervision at IMADA.
For the period 2013-2017 we got 6.5 million d.kr which, among other things finances a PhD student at IMADA.

In 2009 I received funding (approximately 1 million. d.kr.) 24 months post doc positions from The Villum Kann Rasmussen foundation (block stipends). The last postdoc just finished in August 2012.

Currently PI of the DFF funded research project "Packing covering and partitions of digraphs" where I received 2.6 million d.kr for the years 2018-2023.

Supervised 13 postdocs from 1992 to 2012, currently supervising one postdoc.
