## Education and Academic Background

2020 - 2022      MSc in Engineering of Bioengineering at Aalborg University, Esbjerg  
2021              Bioengineering at University of Wisconsin - Green Bay  
2017 - 2020      BSc in Engineering at Aalborg University, Esbjerg

## Teaching Experience

During my education, I have been supervising and helping undergraduates with their projects concerning both experimental development and project planning. Furthermore, I got the opportunity to test the waters of teaching by schooling elementary school students in Tamil. Under the supervision of experienced teachers, I have become an independently functioning instructor who can educate in Tamil through Tamil culture, language, and literature. By embracing the opportunity, I learned to prepare flexible study activities and operate within constraints from which I have developed the requisite for managing different types of tasks.
