## **TEACHING CV**

### **Pedagogical View**

My approach to teaching is grounded in theory-based lectures, combined with practical applications within assignments, group work and case studies. Within project-based courses I like to put more emphasis on the social aspect of group work and my role as a supervisor that leaves the students with room to explore their ideas.

### **Teaching Experience**

My teaching experience is based on lectures and supervision in multiple bachelor courses, as well as in the development, teaching and supervision of master's students within the programmes of Engineering, Innovation & Business (BSc, MSc) and Supply Chain Digitalisation (MSc).

### **Formal Pedagogical Training**

As part of my PhD and TEK onboarding I will take part in multiple trainings, courses and workshops regarding teaching.
