4. Metoder, materialer og redskaber.

I forbindelse med holdundervisning benyttes fortrinsvis Power Point-præsentationer, der disponeres således at der lægges op til aktiv diskussion og deltagelse af de studerende. Der udvælges typisk centrale illustrationer og mængden af tekst begrænses til det absolut nødvendige med henblik på at præsentationerne kan danne udgangspunkt for en faglig diskussion frem for præsentation af fakta der fremgår af andet undervisningsmateriale. Timerne indledes typisk med en præsentation af emnet og et væsentligt klinisk spørgsmål hvorefter de studerende får mulighed for at diskutere en besvarelse med sidemanden i omkring 5 minutter. Herefter diskuteres besvarelsen i plenum med supplerende teori ved hjælp af Power Point-præsentationen. Det prioriteres at alle studerende får mulighed for at diskutere og stille spørgsmål til de centrale dele af stoffet frem for en meget detaljeret gennemgang af teorien, men spørgsmål til mere specielle emner inddrages når der er mulighed for det.

5. Uddannelsesudvikling og universitetspædagogisk forskning, herunder pædagogiske priser.

Ingen erfaring.
