DRUID Academy Conference for Outstanding PhDs: Economics and management of innovation

The DRUID Academy Conference provides the premier opportunity for talented PhD students of innovation and the dynamics of technical, structural and institutional change, to engage with an international network of senior researchers. The Academy Conference format focuses on strengthening the pipeline of talented new researchers and building mentor-protege´ relationships as well as a strong cross-disciplinary research network.

FreeD: Free the Drones

Droneteknologi dækker over et enormt forsknings-, erhvervs- og samfundspotentiale. Det vurderes, at om få år vil droner være vores vigtigste værktøj inden for en bred vifte af opgaver, hvor det i dag er svært fremkommeligt, meget ressourcekrævende eller umuligt. Erhvervspotentialet vurderes ligeså til at være stort, hvor en ny undersøgelse fra Oxford

Research viser, at hvis Danmark bliver first mover på området, så vil et konservativt skøn pege på, at der på sigt kan skabes mellem 12-15.000 jobs i Danmark. I dag er tilladelse til erhvervsmæssige operationer med droner stærkt begrænset af, at droner skal betjenes af en operatør og ikke må flyves uden for synsrækkevidde. FreeD vil udvikle teknologier, som bidrager til at droner sikkert kan operere i civilt luftrum. Droner skal kunne reagere på objekter i luftrummet (sense and avoid), de skal have et pålideligt kommunikationslink med operatøren på jorden og samtidigt har industrien brug for et redskab til at lave en samlet analyse af, at en UAS operation er sikker og der kan gives tilladelse til flyvning uden for synsrækkevidden (Beyond visual line of sight). FreeD bruger en transportrelateret case om miljøovervågning af skibsfart til at vise forskningsresultaterne. Casen har samtidigt et stort innovationspotentiale, der kan styrke konkurrenceevnen for rederier, som følger lovgivningen på området. FreeD har samlet et unikt team af forsknings-, industrielle og offentlige partnere, som er forankret omkring SDU UAS Dronecenteret.

Innovation as Cultural Building Block

This Agreement shall serve as a framework setting out the general terms and conditions under which the Consultant shall perform certain consultancy services proposed by Lundbeck and agreed to by the Consultant from time to time. The services shall include, but not be limited to, participation in expert meetings and advisory boards, preparation and performance of presentations and expert advice ("Consultancy Services"). The Parties will from time to time agree on a specific Consultancy Service to be performed by the Consultant. The detailed scope of work, timeline, budget and payment schedule, required quality standard as well as other specifics for each Consultancy Service shall be set out in writing in the work orders attached hereto ("Work Order") and numbered in succession; i.e. Appendix 1, Work Order 1; Appendix 1, Work Order 2, etc. Each Consultancy Service shall be subject to the terms and conditions of the Agreement in addition to the specific details set forth in the relevant appendices.

Innovation på vinger: fra droneteknologi til marked

En række nationale og internationale økonomisk-politiske aktører forventer, at markedspotentialet for teknologier til luftbårne droner med henblik på kommerciel anvendelse er stort. De nuværende forestillinger om markedet er dog umodne, herunder hvilke opgaver kommercielle droner kan udføre bedre og/eller billigere end alternative løsninger og hvilke krav det stiller til udvikling af teknologien. Innovation på vinger: fra droneteknologi til marked identificerer de mest relevante anvendelsesområder og markeder og matcher disse med hhv. etablerede virksomheder og mulige opstartsvirksomheder i Danmark, således at virksomhederne igennem afklaring af deres teknologiske muligheder og kommercielle kompetencer kan realisere potentialet for deres drone-relaterede produkter og produktidéer igennem teknologisk innovation. En række små og mellemstore danske drone-relaterede virksomheder har allerede tilkendegivet deres interesse for at agere case-virksomhed i projektet, og et par store danske virksomheder har tilkendegivet, at de vil bidrage til projektet i deres egenskab af potentielle kunder til/medudviklere af dronerelaterede teknologier. Hovedansøger er Center for Integrerende Innovationsledelse (C*I2M), Syddansk Universitet, og partnerne bag projektet er SDU UAS Center, Syddansk Universitet, og UAS Test Center Denmark, Hans Christian Andersen Airport. Der budgetteres samlet set med 4.485 mio. kroner.

Vækst med innovation i danske virksomheder

En styrkelse af dansk produktivitet er afgørende for at sikre velstandsstigning i det danske samfund. I denne sammenhæng er innovation afgørende som drivkræft til at øge virksomhedernes produktivitet. Andelen af innovationsaktive danske virksomheder er dog ret konstant og omkring 50 procent. Dette kan fortolkes som et uudløst potentiale for velstandsstigning i Danmark, hvis andelen kan hæves. Andelen af virksomheder med innovation er lavere i Danmark end i lande som Sverige, Holland, Tyskland og Frankrig. Herudover er intensiteten i erhvervslivets forskning og udvikling (FoU) faldet fra 2013 til 2014 og andrager nu det laveste niveau siden 2009. Dette giver anledning til tre vigtige spørgsmål: 1.Hvorfor har nogen virksomheder innovation, mens andre ikke har? 2.Hvorfor investerer nogle virksomheder meget i innovation, mens andre har beskedne investeringer? 3.Hvordan kan innovationsomfanget øges i danske virksomheder? Disse spørgsmål er vigtige især, når det konstateres, at der er stor forskel på intensiteten af innovation mellem virksomheder, selv indenfor snævert definerede brancher eller virksomhedsstørrelse.
