

1991-1996: Member of European steering group behind the TEMPUS-project: "Development of Medical Education for a New Public Health in Hungary".

1993: Organiser and course leader for "International course on risk assessment", Szeged, Hungary.

1999: Organizer, Course leader for "International course on risk assessment" in Thailand.

2004-2005: Member of UN expert committee on health effects of mercury and faculty member at three international courses organized by UNEP on health effects of mercury held in Pretoria (South Africa), Dakar (Senegal), and Beirut (Lebanon).

JBN has taught toxicology, environmental and occupational medicine, risk assessment and risk perception for medical students for more than 20 years since 1984. JBN has been responsible for development of the curriculum, organizing teaching and examination in environmental medicine and clinical nutrition at the medical faculty in Odense for more than 12 years. JBN has been responsible and/or taught on several international courses in risk assessment and risk communication. JBN has authored or co-authored study notes in toxicology for medical students and acted as referee on text books on basic pharmacology and toxicology. JBN has supervised an extended number of bachelor, master, and phd-students, primarily within experimental toxicology.
