Formal educational training

2021-2022: Lecturer Training Program (Universitets pædagogikum) including;

- Course: Supervision - Roles and Relations
- Course: Motivational teaching
- Course: Students as Learners
- Course: Research Based Teaching

Administrative tasks related to education

2021-22: Responsible for modernizing and updating "Introduction to Bioinformatics" (5 ECTS, ~90 students.)

Experience with teaching, supervision and examination

Teaching:

2021-2022: Responsible lecturer and examiner; Introduction to Bioinformatics. Bachelor course (5 ECTS, ~90 students).

Responsible for planning, implementing, examination, evaluation, and production of teaching materials.

2021-2022: Lecturer; Biostatistics in R II. Master course (5 ECTS, ~45 students)

2020-2022: Lecturer; Molecular biology and protein chemistry. Bachelor course (10 ECTS, ~100 students).

2010-2019: Teaching assistant; Basic molecular biology courses and Bioinformatics courses.

Supervision:

2019-2022:

- 1 Postdoc
- 7 PhD student
- 3 Master student
- 5 ISA student

2012-2019:

Training and co-supervision of undergraduate students (pre- and post-bachelor level)

Methods, materials and tools

Teaching:

As a teacher, I have an inclusive teaching style where I try to engage with students to facilitate teaching through interactive lectures and feedback - even in traditional lectures with approximately 100 students. I believe that teaching that invites the students into the process has the potential to create a comfortable teaching environment, where both student-to-student and student-to-teacher discussions contribute to productive learning.

Supervision:

As a supervisor, I have an 'open door' policy, which aims to encourage students to engage with me in informal talks about their projects. In addition, I try to integrate my student with different research groups by promoting collaboration. This gives the students a sense of belonging with other students, even though my group is very small. I believe that an open and engaging environment creates the foundation for a good working environment, personal growth and a strong group mentality.

Educational development and educational research as well as educational awards
