Pædagogisk grundsyn

Pædagogisk grundholdning nr. 1

Jeg vil tilgodese forskellige typer af studerende og forskellige præferencer for læring i min undervisning. Dette vil jeg gøre gennem varieret brug af undervisningsformat, fx, ved brug af tavleundervisning kombineret med opgaver og anden studenteraktivering.

Pædagogisk grundholdning nr. 2

Min holdning er, at motivation skabes bl.a. via gennemsigtighed. Det vil sige de studerendes har mulighed for at se relevansen mellem undervisningens indhold, læreprocessen som anvendes i undervisningen og de mål der er opstillet for faget/semestret. Derfor vil jeg i undervisningen bestrebe mig på at være tydelig i forhold til at beskrive målet med undervisningsforløbet samt målet med den enkelte undervisning. Og være tydelig i at beskrive relevansen af indholdet i undervisningen i forhold til målet med faget og læreprocessen der gøres brug af.
