Management Experience and Scientific Research Leadership

In 2005, I was employed as professor and Research Leader of the Strategic Organization Design Unit (SOD) at the University of Southern Denmark. Since 2005, I have used my international network to build a dynamic research environment that has attracted a number of young international researchers. Today, the SOD unit includes 14 employees of which six are international scholars with PhD's from institutions such as London Business School, Stanford University, University of Cambridge, University of Michigan. (See <http://www.sod-research.com/>). The SOD unit has a very lively international seminar program and has been a host to numerous international PhDs, some of which have based the bulk of their thesis on results obtained in collaboration with researchers in my unit. SOD is now recognized as a leading international environment for research in organization design.
