Education Training

2019

M.Ed. will be taken in due time

Administration tasks related to education

None

Experience with teaching, supervision and examination

Teaching:

1st DeINAM Workshop on Design and Synthesis of Nucleic Acids Mimics;

KE825: Nucleic Acids in Medicinal Chemistry and Nanobiotechnology, 2019 spring semester, 5 ECTS

Supervision:

Master thesis Program, 09/2019 - 01/06/2020, 30 ECTS

IAKE805: Individual study activity in Chemistry, 2019 autumn semester, 5 ECTS;

IAKE802: Individual study activity in Chemistry, 2018 autumn semester, 10 ECTS;

Exam:

Serve as the examiner (with the external censor) for oral exam in course KE825

Methods, materials and tools

Teaching is carried out in the combination of in-class lectures, classroom tutorials and lab exercise. The final evaluation is an outcome of the individual project and the performance in the oral exam;

Supervision is carried out on a daily base through discussion and guidance to fulfill the training purpose;

Educational development and educational research as educational awards

None

Reflection on you own teaching practice and future development including student evaluation

With the learned experience in the previous teaching practice, my teaching skills has been improved on how to efficiently complete the knowledge transfer from the instructor to each individual student in the courses or in the research-based activities. This will tremendously help my future teaching activities related to my reaching responsibilities. On the basis of the students' evaluation, the course content and design principle will be accordingly modulated to be compatible with the students' expectation, learning pace and interests.
