1. Formal Educational Training

Experience from 20 years of clinical practice together with course lecturing and seminar speaking. No formal teacher training.

2. Administrative tasks relating to education

Outside SDU:

Organiser and course lecturer on a 2-day seminar on neck pain and headache for GPs, chiropractors and physiotherapist in Norway - 2016 and 2018.

Twice yearly over a period of 10 years participated in lectures of MSK related complaints for 3rd year medical student at NTNU, Norway- 2004 – 2014.

3. Experience of study programmes, supervision and examination

Supervision of Bachelor students (in groups) on their Bachelor-projects with examination of their written work as well as an oral examination – autumn 2017, spring and autumn 2018, spring and autumn 2019, spring 2020: 15 groups with a total of 61 students.

Lecture in physical assessment of the locomotor system (elbow) - spring 2018.

4. Methods, materials, and tools

Group supervision, examination of oral and written exams.

Power point presentations, videos, and blackboard (e-learn) used for communication.

Active learning with practical examples from clinical practice put in context with research and public health purposes.

5. Educational development and applied research into teaching at university

I try to make supervision and teaching clinically relevant as well as founded on best evidence and suitable research methods. I want students to see their role as future healthcare personnel, their knowledge and competencies in a public health perspective and in the best interest of the individual in need of care.
