

Teaching Portfolio

1. BASIC TEACHING PHILOSOPHY

As a student, I learned that the best teachers were those who had a passion for the subject they were teaching and teaching as such. This passionate and effective teaching can be reached through thorough preparation, permanent improvement of teaching skills, and the gratification of watching students learn. My main goal as a teacher is to impart knowledge to students, not just memorizing facts, but to learn how to think. In my teaching experience, this goal can be reached by the combination of formal lecture periods, smaller discussion sections, and direct feedback on the learning (and teaching) experience.

During the formal lecture periods, students are taught the fundament of a subject to let them get/see the big picture. In the area of Human Resource Management and Organisation the Theories form the foundation of our research and education. It is important to teach these complex issues in a simple and understandable way, to give the students a better understanding of the big picture.

In the discussion sections, the students work in small groups and discuss the theories, their implementation in the research context, and the usual way they solve problems in the 'real' environment. Through these discussions, students obtain a deep understanding of the theories. I act as a moderator asking the students questions to develop step by step the relationship between theory and reality. By this the students do not only learn to memorize the content easily, but they can also use the theories learned in a wider context. By letting all students participate in the discussion they also have the opportunity to be part of the learning process itself.

Feedback is an essential part of the learning process. Students should always have the opportunity to give and receive feedback during the learning process. Following the motto 'disturbances take precedence', students can actively manage the learning process. At the end of a lecture the students have the opportunity to review the overall performance during a separate section. This will give me the possibility to improve the structure, used teaching methods, and my own teaching skills.

One of my favourite teaching experiences was the project within the scope of the master programme 'Human Resource Management' at the University of Hamburg. The main goal of the course was to teach students how to accomplish a research project starting with a draft of an idea up to a final presentation and a report of the main findings. In small groups the students learned, how to research in the field of Social Sciences in an appropriate way. My colleagues and I guided the students through the different steps of the research process. The course included formal lecture periods teaching basic parts of the course subject and research methods. In order to stimulate discussion, the students were given the opportunity to discuss topics and problems of their research with the whole plenum. Furthermore, we acted as research consultants and discussed with and advised the different groups according to the way they were conducting their research. We also used different synchronous and asynchronous e-learning tools to structure the learning process more efficient, being able to give feedback and letting the students help each other at any time. In my opinion, the greatest achievement throughout this were the moments when you saw the lights flashing in the student's eyes when they work a problem through to completion.

2. TEACHING EXPERIENCE

University of Southern Denmark – Campus Sønderborg

Summer 2014 - 2019 Lecture 'International Management and Leadership' (undergraduate level) Teaching methods: lecture, group discussion Assessment: term paper, oral presentation

Lecture 'International Human Resource Management' (graduate level) Teaching methods: lecture, group discussion/presentation Assessment: written examination

Autumn 2015 - 2017 Seminar 'Advanced Business Research Methods' (graduate level) Teaching methods: lecture, group discussion/presentation Assessment: term paper (research report), oral presentation

Autumn 2014 - 2015 Lecture 'Introduction to Study Skills' (undergraduate level) Teaching methods: lecture, group discussion, classroom exercise Assessment: written essay

Autumn 2013 - 2014 Lecture 'Consumer Marketing/Behaviour' (graduate level) Teaching methods: lecture, group discussion, flipped classroom, e-lecture/-teaching Assessment: written examination

Seminar 'The Business Plan' (graduate level) Teaching methods: lecture, group discussion Assessment: term paper, oral presentation

University of Applied Sciences Flensburg

Autumn 2016 - 2019 Lecture and Writing Lab 'Technical and Scientific Writing' (graduate level) Teaching methods: lecture, exercises, oral and written feedback, group discussion Assessment: term paper, oral presentation

Helmut Schmidt University Hamburg

Spring 2013 Lecture 'International Human Resource Management' (graduate level) Teaching methods: lecture, group discussion Assessment: term paper, oral presentation

Spring 2013, 2011 Lecture 'Fundamentals of Corporate Management: Organisational Behaviour. Human Resource Management' (undergraduate level) Teaching methods: lecture/presentation Assessment: written examination

Autumn 2012 Seminar 'International Management: Innovation and Demographic Change – Innovative Ability and Organisational Demography' (graduate level) Teaching methods: lecture/presentation, group discussion Assessment: term

paper, oral presentation

Autumn 2010 - 2012 Seminar 'Communication and Leadership' (graduate level) Teaching methods: lecture/presentation, group discussion, oral feedback Assessment: practical application, term paper, oral presentation

Seminar 'Corporate Management: Organisational Behaviour, Job Demands and Job Resources' (undergraduate level) Teaching methods: lecture/presentation, group discussion, oral and written feedback Assessment: term paper and oral presentation

University of Hamburg

Winter 2012 Seminar 'More Success? Women in Leadership Positions and Mixed Leadership – Theoretical Foundations and Empirical Findings' (graduate level) Teaching methods: lecture/presentation, group discussion, oral and written feedback Assessment: term paper and oral presentation

Summer 2010 - 2011 Tutorial 'Introduction in the Statistical Programme SPSS' (graduate level) Teaching methods: lecture/presentation Assessment: exercise

Winter 2009 - Teaching Project Master Programme 'Human Resource Management': Summer 2011 Quality of Working Life – Quantitative and Qualitative Approaches (graduate level) Teaching methods: lecture/presentation, group discussion, different forms of group work, oral and written feedback Assessment: project draft, project report, oral presentation, oral examination

University of Flensburg
