

## Raphael Geiger - teaching portfolio

With passion for teaching and composite manufacturing processes, I am working as assistant professor at the University of Southern Denmark (SDU).

I am teaching materials and manufacturing technologies and support several lectures within composite materials and manufacturing in undergraduate and graduate teaching programs.

Actually I am participating in our SDU internal Lecture Training Program (LTP). Within this program I am focusing on students benefit from lab teaching.

Further I am building up and running a 300sqm composite lab. The research focus is on composite manufacturing technologies and composite materials to improve drones.
