Susanne Mandrup is Director of the Center of Excellence in Functional Genomics and Tissue Plasticity (<https://www.sdu.dk/en/atlas>) and the Center of Adipocyte Signaling (www.sdu.dk/adiposign) and heads the Functional Genomics and Metabolism Research Unit (www.sdu.dk/bmb/functionalgenomics). Her own group (<http://www.sdu.dk/mandrupgroup>) focuses on understanding the transcriptional networks regulating differentiation and function of adipocytes as well as cellular plasticity of the adipose tissue and the endocrine pancreas in obesity. Her group has contributed significantly to the current understanding of the interplay between transcription factors, chromatin and metabolism in the regulation of gene expression, in particular during adipocyte differentiation and function.
