Formal educational training

-

Administrative tasks related to education

-

Experience with teaching, supervision and examination

Teaching:

-

Supervision:

Current students:

1 PhD (co-supervisor)

Former students:

1 Master

1 ISA

Methods, materials and tools

Teaching:

-

Supervision:

As a supervisor, I have an 'open door' policy, which aims to encourage students to engage with me in informal talks about their projects. In addition, I try to integrate my student with different research groups by promoting collaboration. This gives the students a sense of belonging with other students, even though my group is very small. I believe that an open and engaging environment creates the foundation for a good working environment, personal growth and a strong group mentality.

Educational development and educational research as well as educational awards
