Use of 3D Scan of Weld Joint in Finite Element Analysis and Stochastic Analysis of Hot-spot Stresses in Tubular Joint for Fatigue Life Estimation

DAMPED UPDATED FINITE ELEMENT MODELS FOR DYNAMIC DESIGN
Arora, V., sep. 2019, Proceeding of the 14th International Conference on Vibration Problems. Springer

Validation and model updating of weld in finite element model of K-node structure using experimental data for fatigue analysis

Determination of optimal coupling stiffness using modal updating techniques for Stiffened Plates
Shrivastava, K., Vijayan, K. & Arora, V., 2019, I : Procedia Structural Integrity. 14, s. 556-563

Damped updated finite element model for damage detection

Determination of optimal coupling stiffness using modal updating techniques for a Stiffened Plates

Use of damping identification technique for damage detection

Uncertainty in the modal parameters of the structural elements within a stiffened structure

Validation and Model Updating of Weld In Finite Element Model of K-Node Structure Using Experimental Data for Fatigue Analysis

FRF-BASED PROBABILISTIC MODEL UPDATING IN STRUCTURAL DYNAMICS FOR UNCERTAINTY IDENTIFICATION AND QUANTIFICATION
Arora, V., Adhikari, S. & Friswell, M. I., 2017. 6 s.

Identification of viscous and structural damping in the dynamic system
Arora, V., 2017, I : International Journal of Structural Engineering. 8, 4, s. 345-360
Natural frequencies-based stochastic finite element model updating using equal weighting factors

Updating finite element model of façade scaffolds anchor considering experimental data

A Blind Source Separation Based Approach for Modal Parameter Estimation in Traditional Input-Output Experimental Modal Analysis Framework

Comparative study of finite element reduction techniques for damping identification in dynamic system

Design of new scaffold anchor based on the updated finite element model

Validation of finite element updated models of the developed façade scaffold anchor

FRF-based finite element model updating method for non-viscous and non-proportional damped system

Direct structural damping identification method using complex FRFs
Arora, V., 2015, I.: Journal of Sound and Vibration. 339, s. 304-323

Hybrid viscous-structural damping identification method

Acoustic-based damage detection method

Constrained antiresonance frequencies based model updating method for better matching of FRFs
Arora, V., 2014, I.: Inverse Problems in Science and Engineering. 22, 6, s. 873-888

Direct structural damping identification method

FE model updating method incorporating damping matrices for structural dynamic modifications
Arora, V., 2014, I.: Structural Engineering and Mechanics. 52, 2, s. 261-274

Structural damping identification method using normal FRFs
Arora, V., 2014, I.: International Journal of Solids and Structures. 51, 1, s. 133-143
Use of resonance and antiresonance frequencies for better matching of frequency response function
Arora, V., 2014, I : International Journal of Structural Engineering. 5, 1, s. 13-23

Structural damping identification using finite element model updating
Arora, V., 2013. 8 s.

Structural dynamic modifications using damped finite element model updating
Arora, V., 2013. 7 s.

Comparative Study of Finite Element Model Updating Methods
Arora, V., 2011, I : Journal of Vibration and Control. s. 2023-2039

Identification of stiffness and damping properties of axial air-foil bearings

Further experience with model updating incorporating damping matrices

Identification of dynamic properties of radial air-foil bearings

Comparative study of damped FE model updating methods

Damped FE model updating using complex updating parameters: its use for dynamic design

Damped model updating using complex updating parameters

Finite element model updating with damping identification

On the use of damped updated FE model for dynamic design
