Personal Statement

I am currently employed as Head of the Research Management at Faculty of Humanities, University of Southern Denmark (since 2012). My areas of responsibility in this position can be divided into three main areas: 1. Strategic management service (on external funding) for the Dean at Faculty of Humanities and the Executive Board at SDU. 2. Strategic project development service and application support for research groups and individual researchers. 3. Daily management of the grants office at Faculty of Humanities.

I am more over IT coordinator at the Faculty of Humanities.

I have been employed at SDU since 2001 starting out working with the research group that later developed an education program in Logopaedics and the research center Center for Language Acquisition. In the time from 2001-2012 I have had many very different responsibilities. From student secretary to key note speaker on international conferences. I have collected the majority of data in a national segmentation study of 3-year-old children's language. Later I have been involved in the development of a national screening tool for language problems for children in the age range 3 to 6 years old. Since 2007 I have been project manager on the cross-language Web service CLEX, (Cross Linguistic Lexical Norm). An online web service that allows sharing of research data on children's early language development.

Education

2009 Master of Science (MSc) in Information Technology, IT University of Copenhagen
