Teaching Philosophy

I have been involved in teaching at the University of Southern Denmark as a co-lecturer for the Nano Optics course (graduate level). I was mainly responsible for high-quality lectures. I enjoy lecturing, and my point was to make students motivated and to inspire them with unlimited opportunities of science. Nevertheless, this is not a one-way road, for me teaching is also a true way to verify my own knowledge and understanding; students are always forcing you to learn more. I am always looking forward to taking the responsibility of undertaking high-quality teaching.

Experience with Teaching and Supervision

Teaching:

Nano Optics (Fall 2019): Co-instructor

Supervision:

02.2020– 06.2020, Jakob Emil Olsen, Martin Koch Nørgaard, Bachelor thesis, co-supervisor with Prof. Sergey I. Bozhevolnyi. Project: Experimental study of Surface Enhanced Raman Spectroscopy of a periodic array of circularly-shaped gap plasmon resonators.
