Pedagogical view

My pedagogical view is that motivation of the students to question basically everything and to critically engage with information will maximize understanding and autonomy.

Teaching experience

I have taught both bachelor and master level students, and supervised bachelor students in both semester projects and well as final projects. In addition, I have taught supper courses with overwhelmingly international student participation.

Formal pedagogical training

I have passed The Lecturer Training Programme, offered by Centre for Teaching and Learning University of Southern Denmark.

Other activities related to education and development of supervision skills

I have served as Project Manager within private companies, supervising staff from both Europe, The US and Asia.
